Bunn		Oct 18 1906 p8
------	--	----------------

As nearly as we can get them these are the facts about the wreck in which the lives of Engineer Fred Lee, Fireman King and Assistant Bunn, were snuffed out.

The wreck occurred at Lupfer thirteen miles west of Whitefish. The freight train had orders to take the siding at Lupfer. Passenger train number 4 in charge of Conductor Steve Rywater, Engineer Cy Shutt, and Fireman Stevens had orders to pass the freight at Lupfer.

Why the freight was on the main track when it should have been on the siding is not known for the reason that the man who placed it there is dead. Conductor was in charge of the freight and he at least ought to know why his train was on the main track instead of on the siding according to orders. As a matter of fact the impact was something terrific, but strange to say no one on the passenger train was seriously hurt. Dave Hoover, formerly of Kalispell was hurt worse than any one else. J. B. Gibson is minus a tooth and Michel Therriault was shaken up but does not consider that he received any injuries. Engineer Shutt and Fireman Stevens were slightly scalded. Both engineers were converted into scrap iron.
